PROFESSIONAL SUMMARY

Full Stack Java developer with a strong foundation in Data Structures and Algorithms (**DSA**) and experience in solving problems. Skilled in backend development using Spring Boot and database management with MySQL. Proficient in API testing using Postman and currently learning React.js to enhance frontend development skills. Dedicated to delivering efficient, scalable solutions with high-quality code.

EDUCATION

V.O.CHIDAMBARAM COLLEGE	2021 - 2024
Computer Science Bachelors	Thoothukudi - 8
AUXILIUM MATRICULATION HR.SEC SCHOOL	2020 - 2021
Computer Science	Thoothukudi - 1

SKILLS

Programming Languages	Java, JavaScript
Web Technologies	Html, Css
Libraries / Framework	SpringBoot, Spring MVC, Rest API, React js
Tools / Platform	Git, VS Code, IntelliJ, Postman
Databases	SQL

PROJECTS

ECOMMERCE WEBSITE | [LINK](#)

- Developed an E-commerce website using Spring Boot for the backend and React.js for the frontend, ensuring smooth and efficient operations.
- Backend is implemented with Spring Boot, JPA, and MySQL, providing efficient data management, API handling, and seamless database interactions for users.
- Dockerized the Backend and deployed it in Real-time, allowing scalability, seamless accessibility, and consistent performance across different environments.

Tech Stack

Backend : Spring Boot, Java, JPA, MySQL, REST API

Frontend : React.js, CSS, HTML

Containerization : Docker for backend.

Version Control : Git and GitHub for code Management

Deployment : Render (Backend), Netlify (Frontend),
Clever cloud (Database).

STUDENT MANAGEMENT (CRUD) API | [LINK](#)

Developed a full-stack application to manage student details using Spring Boot for the backend and MySQL for the database. The backend provides RESTful APIs to handle **CRUD** (Create, Read, Update, Delete) operations. The frontend was developed with HTML, CSS, and JavaScript, using the Fetch API to communicate with the backend. Tested and validated the APIs with Postman to ensure smooth functionality.

Html, Css, Javascript, Java, SpringBoot, MySQL, Rest API

WEATHER | [LINK](#)

- Developed a weather application using HTML, CSS, and JavaScript, fetching real-time weather data from an API and displaying essential details.
- Implemented dynamic updates with JavaScript, allowing users to search cities and view temperature, humidity, and wind speed without page reloads.

JavaScript , HTML , CSS ,OpenWeatherMap API
